ENVISIONWARE®

Enriching Public Library Service Inside and Out

MOBILE PRINTING

EnvisionWare's mobile printing solution was designed to make library printing easy and accesible to patrons on the go.

Flexible and Intuitive Printing Solutions

With mobile printing, patrons can print remotely or within the library from smartphones, tablets and computers and pick up their printouts at the library. The solution offers several benefits, including:

- Intuitive user interface to empower patron self-service.
- Advanced speed for fast time-to-print.
- Stability patrons can count on.
- Industry-leading data security (ISO 27001:2022 certified), providing patrons and staff peace of mind that their data is safe.

EnvisionWare's MobilePrint Service™ is fully integrated into LPT:One™, EnvisionWare's print management solution. To release their documents, patrons or guests enter their credentials at the LPT:One™ Print Release Terminal. Since the module is fully integrated into LPT:One, patrons can pay for print jobs using all of the standard LPT:One payment options. No new hardware is required and unlimited printers per building are supported.

EnvisionWare's mobile printing solution is powered by Princh. Princh is a trusted brand with a reputation for strong support and continuous improvement.
