

The SmartHolds shelves simplify and streamline the holds process, enhance patron privacy and eliminate printed hold slips.

With the SmartHolds shelves, staff can place items in any designated order — alphabetical, date processed or hold expiration date. The RFID-enabled shelves will automatically learn the position for each item. Patrons simply scan their library card and are automatically notified of the item's shelf location, making it easy to locate and enhancing patron privacy.

### Flexible and Mobile

The shelves are designed to be flexible and mobile. The shelving is on wheels and connected by a single cable, making it easy to reconfigure your space and add shelving as needed.

- Flexible and expandable
- Stylish design
- Private patron experience
- Easy and intuitive
- Items immediately available
- Integrate with any SIP2-enabled ILS
- Supports ISO-standard and vendor-proprietary RFID data models
- Includes RFID-enabled SmartHolds shelf and self-service kiosk with touch screen and receipt printer

## Specifications
