ENVISI NWARE®

Enriching Public Library Service Inside and Out

LIBCABINET

The LibCabinet enables you to expand library services into your community at busy and convient locations.

With the LibCabinet, patrons can check out books, pick up holds and return items at their convenience. Designed for indoor use, the LibCabinet has a small footprint that fits almost anywhere, but has the capacity to offer over 200 items for patrons to choose checkout.

Fast, Easy and Intuitive

The LibCabinet is easy to use. To check out a book, a patron simply scans their library card and the door unlocks. Books are checked out automatically when removed from the shelves. The patron closes the door when finished and takes their receipt. Returning items is just as easy — scan, return and go.

This mini indoor library is easy to get up and running — all that it requires is a network cable and power outlet.

Full Inventory Overview

The LibCabinet communicates to your ILS via the SIP2 protocol. The software has a full feature maintenance mode. While in maintenance mode, you can perform a full inventory and print out the results. LibCabinet can be connected to EnvisionWare's Centralized Management software, which provides reporting and remote control functionalities.

- Extends your reach into the community
- Convenient and fast checkout, checkin and holds pickup
- Scan a patron library card number from a card or smartphone
- Fully self-service operation
- Supports a collection of over 200 items

LibCabinet
